

## The MCT-24DHRD Series

Dual & Single In Line Package (SIL & DIL)

Digital Temperature & Pressure Outputs

I<sup>2</sup>C & SPI Protocols

### DESCRIPTION

Advanced Sensors Multi Chip Technology (MCT) 24DHRD Series incorporates a bonded silicon gage to the latest mixed signal ASIC (Application Specific Integrated Circuit) with a leading **24Bit** High Resolution ADC ( $\Sigma \Delta$ ) specifically designed for medical, life science and avionic control industries. The MCT 24DHRD Series provides a 24bit digital pressure and 16 bit digital temperature output in SPI and I<sup>2</sup>C protocols. The advanced design requires no external calculation since a fully integrated digital signal processor (DSP) performs an error correction algorithm. The designs superior performance provides 1% Total Error across a wide temperature range of -10 to 85° Given these features and an advanced low power design; the MCT-24DHRD series is the ideal choice for OEM customers.
